WE ARE A BOUTIQUE LAW FIRM comprised of business-minded lawyers committed to providing the highest quality of legal representation at prices significantly lower than the large regional, national and international firms. Our attorneys are veterans of major national law firms and have either earned a MBA or served as general counsel to publicly held and privately-held companies. As a result, we work closely with our clients' executive management teams to provide innovative and cost effective legal representation, as well as business counseling and strategic planning tailored to a client's specific business needs.

WE PROVIDE a full spectrum of legal services in the areas of corporate law, venture capital and financing, mergers and acquisitions, joint ventures, licensing and contract negotiations, real estate, employment law, intellectual property and commercial litigation. Unlike other boutique law firms, we understand that there are certain large transactions or “bet the company” types of litigation that may warrant the expertise and breadth that a large, national law firm can offer. We have relationships with and often work together with several national and international firms, which allow us to assist our clients in selecting the perfect representation for the situation at hand. This approach provides the client the “best of both worlds” – the personal attention and expertise of a boutique firm with access to large law firm lawyers when necessary. The total cost of this approach is significantly lower than a traditional law firm model. We have found that many of our clients have experienced a reduction in their overall legal budgets of up to 40% - all while receiving a more responsive and personal experience.

OUR CLIENTS, who range in size from start-up and emerging growth companies to public companies, are found in various industries such as:

- **Software development and licensing**
- **Web-based applications and e-commerce**
- **Mobile and telecommunications**
- **Data and content aggregation and distribution**
- **Information technology**
- **Alternative energy**
- **Technology licensing, transfer and distribution**
- **Life sciences**
- **Entertainment, communications and media**
- **Real estate investment, development and leasing**
- **Manufacturing and distribution**
